MAKSIM KHAVRAI

PROFESSIONAL SUMMARY

Nearly three years of professional experience supporting engineering projects from technical development through installation and pre-commissioning. Experienced in coordinating with clients, contractors, and suppliers, preparing technical documentation, and supporting procurement and on-site activities. Seeking to bring this experience into the Canadian construction industry.

WORK EXPERIENCE

Project Engineer
Air Liquide | Russia
2 years 8 months (January 2024 - August 2026)

- **Supported successful delivery of industrial gas projects** by coordinating contractors, suppliers, designers, and engineering teams through installation and pre-commissioning.
- **Enabled project procurement and equipment delivery** by coordinating purchase requests and technical requirements with suppliers.
- **Improved project execution and handover** by coordinating technical documentation across clients, contractors, suppliers, and designers.
- **Supported installation-ready project delivery** by developing engineering solutions and participating in installation, equipment readiness checks, and pre-commissioning.
- **Reduced manual engineering work and strengthened design compliance** by automating calculations and drawings and reviewing external design work against project requirements.

Selected Project Experience: Industrial gas storage, vaporization, and supply systems for food processing, aquaculture, chemical manufacturing, and industrial facilities.

EDUCATION

2026-2027
New Brunswick Community College (NBCC)
Graduate Certificate
Applied Construction Management
Expected graduation: April 2027

- **Developed practical skills in construction project management** covering project planning, scheduling, cost control, procurement, contract administration, quality, safety, and project performance monitoring.
- **Gained hands-on experience in construction estimating and bidding**, including quantity takeoffs, cost estimates, drawing and specification analysis, subcontractor bids, and tender preparation for commercial projects.
- **Expanded technical construction knowledge** through practical work with drawings, specifications, building components, and industry-standard software.

2023-2025
Gubkin Russian State University
Master's Degree
Mechanical Engineering (Technological machines and equipment)
Graduation: June 2025

- **Developed skills in evaluating and optimizing engineering systems** based on technical and operational requirements.
- **Strengthened engineering analysis and problem-solving skills** for evaluating equipment performance and technical solutions.
- **Gained experience in engineering research and technical decision-making** for complex engineering problems.

2019-2023
Gubkin Russian State University
Bachelor's Degree
Mechanical Engineering (Technological machines and equipment)
Graduation: June 2023

- **Built a strong foundation in mechanical engineering** through mechanics, materials, thermodynamics, and machine design.
- **Learned to develop and interpret engineering drawings and technical documentation** for mechanical equipment and systems.
- **Developed engineering calculation and design skills** for industrial machinery, equipment, and mechanical systems.

TECHNICAL SKILLS

Core Competencies

- Project Coordination
- Construction Drawings and Specifications
- Quantity Takeoffs and Estimating
- Project Documentation
- Contractor and Supplier Coordination
- Equipment and Material Procurement
- Technical Documentation

Construction and Project Software:

- Procore
- Bluebeam
- AutoCAD
- Revit
- InfraWorks
- ArchiCAD
- Microsoft Office (Excel, Word, PowerPoint)

Engineering and Analysis Software:

- SolidWorks
- Aspen HYSYS
- UniSim Design
- Mathcad
